## March Weather in Central Kentucky

“**M**arch ushers in the pleasant spring weather in Lexington, making it an attractive period for outings and outdoor activities. This time of the year witnesses a significant leap in temperature, signifying the end of the winter season,” notes [Weather Atlas](#).

**Rollercoaster:** After a rollercoaster ride in February with record 72° temperatures, thunderstorms, heavy snow, and then freezing conditions, March is a welcome change

for many. **Warmer:** Daily high temperatures climb by ten degrees, from 51° to 61°, rarely dropping below 35° or topping 75°, according to [Weather Spark](#). Gradually decreasing cloudy conditions arrive with the clearest day often March 31.

**Days getting longer:** The length of a March day is rapidly increasing. Average sunshine climbs with an average daily maximum UV index of 3, notes Weather Spark. **Last March:** If you recall March 2024, the mercury soared into the 70s before crashing on March 28. In the morning

hours, our region experienced a 30° to 40° temperature drop with thunderstorms, heavy rains, high winds, and hail. Thousands of homes and businesses reported wind damage to trees, buildings, and roofs.

We include these links in this newsletter as a service to the reader. We attempt to provide high-quality content and believe the links provide a great addition to what you are reading.

# CKCS Membership

For the period Jan. 22 – Feb. 21

CKCS Board Member Ben Rice provided the names.

**New members:  
None**

**Renewing members:**  
Janice M. Cox  
Kathy Davis  
Keith Grierson  
Robert G. Riggs  
Joann Shenk  
Brooke D. Thomas  
Robert W. Tibbetts  
Pat C. Vaughan  
Dellann Vickers  
James M. Zabel

## There are *three* ways to join CKCS.

Visit the CKCS website [here](#) and choose a membership:

1. Individual, family, or corporate/institutional membership.
2. Call CKCS at (859) 373-1000 and tell the person manning the desk which membership you want. Pay by credit card.
3. Visit CKCS in person at 160 Moore Drive, #107 in Lexington. A volunteer will greet you at the desk during office hours. If you're unfamiliar with the location, look for the CKCS signage located at the front of the parking lot.

Happy  
St. Patrick's Day  
From All of Us  
at CKCS!

# Spotlight on the CKCS Web page

## President's Report

By Brooke Thomas

This month, we invite you to explore our website at [www.ckcs.org](http://www.ckcs.org).

Kudos to our dedicated Webmaster, Arleigh Kerr, who ensures it's freshly updated at the beginning of each month, and Pennie Redmond, who does the proofreading.

For those of you new to it, our website features a dynamic carousel showcasing Tech Night and Special Interest Groups. To read about upcoming events, simply click the "Click Here" button on each image.

Below the carousel, you'll find a site map with convenient links to the CKCS Facebook page

and the CKCS YouTube Channel. Just click on them to visit those pages.

Need directions to CKCS? Click on the CKCS address, and Google Maps will guide you.

Our website has several tabs at the top, each containing dropdown menus packed with a wealth of information. With everything at your fingertips, you'll be well-informed and ready to engage. Check it out!

# A New Microwave

By Brooke Thomas

We are thrilled to announce that we have a brand new microwave in the kitchen area, all thanks to the generous donation by Angie and Shawn Ross.

When our old microwave unexpectedly broke down, Angie noticed the need for a replacement.

Without hesitation, Angie and Shawn took it upon themselves to buy and install a new one for us.

Next time you're at CKCS, be sure to check out the new addition to our kitchen.

A heartfelt thank you to Angie and Shawn for their thoughtful donation and for always being on top of things!

# Amateur Photography Club

Meets in person on Thursday mornings at 10 A.M.

## THE AMATEUR PHOTOGRAPHERS CLUB of Lexington Kentucky

## Windows SIG

The first session will be on  
Tuesday, March 11, at 7 p.m  
via Zoom .

# WINDOWS SIG IS BACK

We are proud to announce  
that  
**Ben Rice**  
is our Windows SIG  
Coordinator

● ● ● ● ● YAY

If you are interested in  
presenting at this SIG please  
email - [Ben.Rice@uky.edu](mailto:Ben.Rice@uky.edu)

# Genealogy SIG

## Family Tree

Join us in person at 7 P.M. on March 17 as we discuss how to get more out of the National Archives and Records Administration (NARA).

# JOIN US LIVE @ 7 P.M. MARCH 18 ON ZOOM!

Joe & Kurt will present two Apple-related topics.

## Joe: How to prevent your iPhone & iPad from tracking you.

Do you value your privacy and want to take control of your iPhone's tracking settings? We'll cover practical steps to enhance your privacy.

Tired of constant notifications from group texts? We'll show you how to mute them.

Finally, we'll discuss the new iPhone 16e. Learn why this device is a great blend of performance and affordability. If you're considering a new iPhone, you'll want to hear what Joe has to say.

## Kurt: Where's That File?

One of the most often cited complaints from computer users is locating a lost file.

Just when you need that one file stored on your Mac, you can't find it. Where did it go? How can you retrieve it?

There are several techniques to use to locate missing files. We'll show you several options to make missing files a thing of the past.

Zoom link: <https://us02web.zoom.us/j/81185707914>

# Digital Photography SIG

Digital Photography Special Interest Group  
Tuesday, March 25  
In Person

Join us for a session on

Snapseed is a free app and is available for iOS and Android devices.

Snapseed is a complete and professional photo editor developed by Google.

== KEY FEATURES ==

- 29 Tools and Filters, including: Healing, Brush, Structure, HDR, Perspective (see list below)
- Opens JPG and RAW files
- Save your personal looks and apply them to new photos later
- Selective filter brush
- All styles can be tweaked with fine, precise control
- Tutorial cards with tips and tricks about Snapseed and general photography

This month our photo contest is **"Funny or not so Funny."**

Get out-take pictures and send a great photo to [joedietz@aol.com](mailto:joedietz@aol.com) by Feb. 24.

Join us at CKCS at 160 Moore Drive on Tuesday night, March 25 @7 PM. Bring a Friend.

# 2025 Photo Contest Topics

The CKCS Digital Photography SIG hosts this monthly contest.

By Joe Dietz

**March** Signs  
(funny or not so funny)

**April** Happy places

**May** Birds

**June** Waterfalls

**July**

- Clouds
- First signs of spring
- What were they thinking?

*(Three topics in July. Don't email. One hard copy of your photo(s) this month must be delivered to CKCS on Moore Dr.)*

**Aug.** Food photography

**Sept.** Interesting faces

**Oct.** Stained glass windows

**Nov.** Hands

**Dec.** No meeting.

*Except for July, entries must be emailed to [joedietz@aol.com](mailto:joedietz@aol.com). Good luck!*

Print this list and keep it handy.

# Unlocking the Power of VPNs Why You Need One

## In person and via Zoom

A virtual private network (VPN) can be an excellent method of safeguarding your online activity. A VPN is an app that you install on your Mac, PC, iPad, iPhone, Android phone, or other device that connects you to a secure Internet signal.

**“VPNs can be a valuable tool...”**

The Cybersecurity For Me [web-site](#) writes, “VPNs can be a valuable tool for enhancing online security and privacy. VPNs encrypt your internet traffic, making it unreadable to anyone intercepting it. This protects sensitive information like passwords and financial data.”

### Why Do You Need a VPN?

**1. Protect Your Privacy:** VPNs prevent ISPs and other entities from monitoring your online activities. They ensure that your personal information remains private, even on public Wi-Fi networks.

**2. Secure Your Data:** VPNs encrypt your internet connection, making it difficult for hackers to intercept your data. This is espe-

cially important when using unsecured networks at cafes, airports, and hotels.

**3. Access Geo-Restricted Content:** VPNs allow you to bypass geographic restrictions and access content that may be blocked in your region. Whether it's streaming services or websites, a VPN can help you enjoy unrestricted access.

**4. Avoid Tracking:** Advertisers and websites often track your browsing habits to serve targeted ads. A VPN masks your IP address, making it harder for these entities to track you.

**5. Stay Safe While Traveling:** When you're traveling, using a VPN can protect your data and provide secure access to your home country's online services.

Join us for an insightful presentation on VPNs at Tech Night. Kurt Jefferson, CKCS newsletter editor and board member, will talk about VPNs in person and via Zoom.

**March  
10

Registration is now underway [here](#).

# Spring 2025 Class & Workshop

## Course Descriptions

### **Intro to Photoshop Elements for Windows**

In this introductory course to Adobe's Photoshop Elements, we will learn to use the tools of this program to do basic photo editing including adjusting lighting and color, cropping, cloning and spot healing, red eye removal, and many other techniques. We will also discuss photo considerations prior to printing or sharing, introduction to layers, converting images to black and white, enhancing and restoring old photos, adding text, using brushes, graphics, adjustment layers, templates, guided edits, filters and special effects, and a demonstration of how this program can create cards, calendars, slide shows, collages and photo books.

### **Composition-Learning to See Creatively in Photography**

Learn the ingredients for a good photo. We will study the elements of design, perspective, composition, lighting, and color of light. Why are some pictures more appealing than others? They follow some simple rules: A. Simplicity. B. Drawing Attention to the Subject. C. Positioning the Subject. D. Knowledge of Graphic Design for Interest and Harmony. Understanding and using these guidelines will show you how to implement this knowledge and become a better photographer. Instruction will consist of lecture, class discussion & video presentations.

### **Getting the Most Out of Your iPhone**

In the latest iPhone IOS18 update, many things have changed. In this class you will learn important (and hidden) functions of your iPhone. Learn how to download apps, move them, nest them, and delete them. Learn how to get better photos with your phone, organize your pictures, and send them in text and emails. Texting messages and using Siri will also be covered. Participants should bring their (fully charged) iPhone and know (or bring) their passcode, Apple ID and password.

### **iPad Mastery: Unveiling Hidden Features**

Dive into the depths of your iPad and emerge a master of its capabilities. This class offers a comprehensive guide to utilizing the built-in Apple apps to their fullest potential. Tailor your iPad experience by personalizing and organizing your apps, enhancing your photos, and managing your albums with ease. Gain insights into the iPad's settings, uncover keyboard shortcuts, and add flair to your emails and texts with animations. Plus, receive practical tips on optimizing the use of Calendar, Notes, Reminders, FaceTime, and the Libby app. Transform your iPad into a powerhouse of productivity and personal expression.

### **Organizing Your Windows Computer Files**

Have you ever created a file and saved it, only to find you cannot locate it later? We will look at several strategies for organizing your files to make them easier to find. We will also learn techniques for moving files and folders on your computer and external storage devices.

Registration is now underway [here](#).

# Spring 2025 Class & Workshop Course Descriptions

## **Computer Basics for a Windows PC**

Learn the fundamentals of using a Windows computer. Learn to use various aspects of the Microsoft Word Processing program, including manipulating text and inserting graphics into a document. Basic filing and basic file management are introduced. The final class of this course deals with the basics of email and use of the Internet.

## **Get Much More Out of Your Mac**

Students will benefit by learning how to go beyond the basics they have been using on their Mac. This class is designed for students who want to learn more than the basics – we will show you how to use different options built into macOS in addition to techniques which will make you more productive. We'll discuss a variety of topics including Mac security, printing, desktop publishing and configuring your Mac so it works better for you. Students will learn about Mac specifics such as Stacks, Launchpad, open apps vs. apps that are active, customizing the Dock and learning how it works, and keyboard shortcuts to streamline your activity.

## **Intro to Black & White Photography**

Learn how to change a color image to black and white using the six color channels. This allows you to alter the tone of each individual color channel resulting in a more controlled final result with greater depth and contrast.

## **Making Brochures with MS Publisher for Windows**

Students will learn to create professional-looking brochures using MS Publisher. While prior knowledge of Microsoft Word and other Office products can be helpful, it is not required. The skills acquired in this course will enable students to design an effective brochure for their class, church group, club, or their special interest activity with ease. This is just a small sample of the powerful features available in Microsoft Publisher. MS Publisher is part of your Microsoft 365 subscription.

## **Creating Personal Greetings & Note Cards with MS Word**

Never buy another greeting or note card! Let your special talent shine. Learn how to create note/greeting card templates, how to insert graphics/photos and text boxes, and how to add special effects to these elements. Making three-dimensional cards and novelty cards will also be introduced to open the world of possibilities in creating personalized cards. The only limitation will be your imagination. This is a fun and useful class!

## **Adventures in Photography-Introduction to Landscape Photography**

We'll discuss detailed ways to help you creatively photograph a variety of landscapes from fields to coastal scenes whether you are at home or on vacation. We will cover multiple topics including lens selection, depth of field, composition, lighting, shooting panoramas, shooting for focus stacking and stitching. What you learn also will be applicable to your photography in general. The course will include fieldtrip{s} where you will have a chance to practice what you learn, then share your photos in the next class. Students should have a basic knowledge of their camera.

# Spring 2025 Class & Workshop

## Course Descriptions

### **iMovie for iPad: Creating Movies Made Easy**

Unlock the power of storytelling with your iPad in this engaging class. Discover how to use the **free iMovie app** to craft compelling movies using photos and music. Add a personal touch with custom text and smooth transitions. By the end of the session, you'll be ready to share your cinematic creation with friends, family, and on social media. Whether you're a beginner or looking to enhance your video editing skills, this class is your ticket to producing memorable movies with ease.

### **Intro to Windows 11**

This workshop will look at what is new in Windows 11, what has changed, and how to set it up to make it more user-friendly. If you are considering installing it on your computer, this workshop might help you decide whether to install it. On the other hand, if you have already installed it, this workshop might help you set up Windows 11. Students are encouraged to bring their laptop computers if they have Windows 11 already installed. However, ensure your laptop is fully charged before you bring it to class.

### **Making a Photo Book Using Shutterfly**

Students will learn how to prepare pictures for a photo book, how to transfer pictures to the Shutterfly workspace, and then organize the pictures from the front to the last page of the book. Finally, we will go through the steps to ordering the book and applying coupons to reduce the price. We will be using a program called Shutterfly.

### **Using Apple iCloud for your iPhone & iPad**

Learn how to take advantage of your iCloud account. When you purchase an iPhone or iPad you have an account set up in the cloud. Here, you store copies of your photos, contacts, messages, email and more. Students will learn how to set up this account to their best benefit. We will talk about downloading and uploading your files (to and from your iPhone or iPad). We will also discuss how to share documents and photos from the iCloud. Acquiring more storage space will also be discussed.

### **FastStone Digital Imaging Program for Windows PC**

Are your photos in need of a makeover? Want to enhance, crop, and create stunning slideshows without breaking the bank? Look no further! Join our **FastStone Digital Imaging Workshop** and unlock the power of this **free**, versatile program.

# Spring 2025 Class & Workshop

## CKCS Course Descriptions

### Apple Watch: Beyond Telling Time

Join us for an engaging and informative workshop where you'll discover over 20 tips and tricks to maximize the potential of your Apple Watch! Whether you're a new user or a seasoned pro, this session will help you unlock many of the capabilities of your device. Some of the tips include the following: learn how to get help in an emergency, remove apps from your watch, make the text size larger, adjust brightness and wake duration, change the layout of your watch, mute your watch notifications, use your watch as an alarm clock, use auto pause for workouts, use your watch as a flash light and running or walking light at night, unlock your iPhone with your watch, and find your iPhone with your watch. An Apple Watch 6 will be used for demonstration. Many of the features are similar on the different series of Apple Watches that are using the current Watch operating system.

Remember, you can always get a quick look at complete course descriptions on the CKCS class calendar [here](#).

If you would like to teach a class or wish CKCS offered another class or workshop, please email the society president [here](#).

# CKCS Inclement Weather Policy Guidelines for Classes, SIGs, & Office Workers

By Brooke Thomas

**W**e have already had a historically difficult 2025, and if it continues, you

need to be aware of our cancellation policy. Canceling a class or Special Interest

Group (SIG) is left to the discretion of the class teacher or SIG leader.

Many times when we have had bad weather the roads in the city become reasonably clear by the time the class/SIG is scheduled to begin. Many times the instructor will decide to hold the class. The instructor will email the students to let them know if the class is going to be canceled. If the class is held, it's the student's responsibility to decide whether they should attend or miss a class.

If there is bad weather that might impact a SIG please call the office, and the answering machine will have any cancellation alert.

For office workers, if Fayette County Public Schools are called off because of inclement weather, it is up to the individual office worker to decide whether they will be at CKCS or not. Members who call in and fail to reach a human are urged to leave a voicemail message, and most of the time someone will call you back.

During this last stretch of bad weather Mike Seiler did his best to call people back and help them register for a class or help with an issue they were having. Thank you, Mike!

Thank you for your understanding and cooperation during inclement weather conditions.

Stay safe and take necessary precautions.

The CKCS phone number is  
(859) 373-1000.

# Quotes About March

"Spring will come and so will happiness. Hold on. Life will get warmer."

- Anita Krizzan

"A light exists in spring, not present on the year at any other period when March is scarcely here."

- Emily Dickinson

"It was one of those March days when the sun shines hot and the wind blows cold: when it is summer in the light, and winter in the shade."

- Charles Dickens in *Great Expectations*

"March, when days are getting long, let the growing hours be strong to set right some wintry wrong."

- Caroline May

"Where flowers bloom, so does hope."

- Lady Bird Johnson

"A perfect spring day! Enjoy it while it lasts, because you don't know what's coming."

- Marty Rubin

"In March, the snow begins to melt, and the earth wakes up, shaking off its blanket of white."

- Unknown

"Indoors or out, no one relaxes in March, that month of wind and taxes; the wind will presently disappear, the taxes last us all the year."

- Ogden Nash

"The first day of spring is one thing, and the first spring day is another."

- Henry Van Dyke

"March is proof that you can endure the cold and still blossom."

- Unknown

"Spring is sooner recognized by plants than by men."

- Chinese proverb

"Every flower is a soul blossoming in nature."

- Gerard De Nerval

"The March wind roars like a lion in the sky, and makes us shiver as it passes by."

- Unknown

"March is a tomboy with tousled hair, a mischievous smile, mud on her shoes, and a laugh in her voice."

- Hal Borland

"March is when nature starts whispering to you again."

- Unknown

# Facts You Don't Know About St. Patrick's Day

**W**hen it comes to St. Patrick's Day parades, the U.S. hosts more than 100 of them. Nearly 12% of Americans say their roots trace back to Ireland. The shortest St. Patrick's Day parade in the world is held in the Land of Opportunity-Arkansas. The parade is just 98 feet long.

Source: [Thefactlife.org](http://Thefactlife.org)

[Bostonplans.org](http://Bostonplans.org) reports that 13% of people living in Boston claim Irish ancestry. Irish is the third largest ancestry group in America, after German (#1) and British (#2).

Source: [Bostonplans.org](http://Bostonplans.org)

[Statisticalatlas.org](http://Statisticalatlas.org) notes that 12.2% of Kentuckians say they have Irish ancestry. That's just below German (14.4%), and above British (9.9%), Italian (2%), Scottish (1.9%), French (1.6%) and Scottish-Irish (1.4%). The Kentucky city with the highest concentration of people with Irish ancestry is Ekron, located in Meade County. 48% of the population there claims Irish heritage. In case you're wondering, Lexington is ranked 253<sup>rd</sup>, with just 11.11% of its population citing Irish ancestors.

The central Kentucky city with the largest concentration of folks with an Irish background is Sadieville (ranked 85<sup>th</sup>) in Scott County, with 17.8% citing Irish heritage. In 150<sup>th</sup> place is Wilmore in Jessamine County, with 14.2% saying they have Irish ancestry.

Source: [Statisticalatlas.org](http://Statisticalatlas.org) and [zipatlas.com](http://zipatlas.com).

Australia celebrated the 200<sup>th</sup> anniversary of St. Patrick's Day by turning the Sydney Opera House green.

Source: [Thefactlife.org](http://Thefactlife.org)

Discovering a four leaf clover on Saint Patrick's Day is quite rare. Experts say you only have one chance in 10,000.

Source: [Thefactlife.org](http://Thefactlife.org)

Mental Floss notes that Saint Patrick was not Irish. He was born to Roman parents in Wales or Scotland in the late 4<sup>th</sup> century.

Source: [MentalFloss](http://MentalFloss)

The largest U.S. parade held on St. Patrick's Day is in New York City. It dates back to 1762. Some 250,000 marchers hike up Fifth Avenue on foot.

# HISTORICAL PEOPLE YOU MAY NOT KNOW

By Kurt Jefferson

The American Museum of Natural History in New York City in April 2013. Fred F. Scherer created some of his most eye-catching work here between the 1940s and 60s.

Source: Wikipedia per Creative Commons Attribution 3.0 License.

**Fred F. Scherer** was a talented artist and illustrator who started working for the American Museum of Natural History when he was 19. He was hired as an apprentice to help create dioramas, the colorful scenery behind stuffed animals on exhibit. A *New York Times* obituary notes that Scherer had the uncanny skill of bringing to life the scenes he created between the back of the display and glass in front. Scherer was born on March 1, 1915.

**Ida Gray**, born in Clarksville, Tennessee, on March 4, 1867, was the first African American woman in the U.S. to become a dentist. For a time she lived with an aunt in Cincinnati, and eventually graduated in June 1890 from the University of Michigan School of Dentistry.

**Ida Gray**

Source: Wikipedia per Fair Use by an educational newsletter.

**Leonard Colebrook**

Source: Wikipedia per Creative Commons Attribution 4.0 License

British medical researcher **Leonard Colebrook** is responsible for introducing the first sulfa drug, Prontosil. Sulfa drugs are synthetic antibiotics used to treat bacterial infections. They were first used to treat childbed fever, which occurred from infection due to childbirth or abortion. When WWII erupted, Colebrook headed to France where he showed how sulfa drugs, and later, penicillin, were effective in controlling infection in burn victims. He was born on March 2, 1883, in Surrey.

# HISTORICAL PEOPLE YOU MAY NOT KNOW

By Kurt Jefferson

**Alonzo Clayton** circa 1898.

Source: Wikipedia

The youngest jockey ever to win the Kentucky Derby, **Alonzo Clayton**, was born on March 7, 1876, in Kansas City. He was only 15 when he rode *Azra* to victory at a recorded time of 2:41:50. Author Edward Hotaling described Clayton as “one of the great riders of the New York circuit all through the 1890s.” He won 144 races in 1895 alone and won back-to-back races at the Kentucky Oaks.

**Mark Dean**, born on March 2, 1957, is the co-creator of the IBM personal computer released in 1981. In 1995, IBM named Dean its first African American IBM Fellow, the highest level of technical excellence in the company. During his high school years in the 1970s, Dean built his own personal computer. Dean was born in Jefferson City, Tenn., and received a Ph.D. from Stanford University in 1992. Wikipedia notes that Dean told [PCWorld](#) in 2014 that he mostly uses a computer tablet, rather than PC, for everyday tasks.

**Kalpana Chawla**

Source: Wikipedia

Photo taken March 2002

Indian American **Kalpana Chawla** was the first woman of Indian origin to fly into space. Her first trip into space was aboard the Space Shuttle Columbia in 1997 as a mission specialist and robotic arm operator. Chawla was born on March 17, 1962, in Karnal, Haryana, India. She was one of seven who died in the Space Shuttle Columbia disaster when the spacecraft exploded upon reentry into earth’s atmosphere on Feb. 1, 2003. A number of buildings, spacecraft, and landmarks are named in her honor.

# HISTORICAL PEOPLE YOU MAY NOT KNOW

By Kurt Jefferson

**Emmy Noether** circa 1900.  
Source: Wikipedia per  
Cordula Tollmien

**Emmy Noether** was considered to be one of the most talented mathematicians of her era. She was born on March 23, 1882, in Bavaria, German Empire. Albert Einstein and others described her as the most important woman in the history of math. Her major contributions were in the area of abstract algebra. The Nazi regime expelled Noether, who was Jewish, from teaching at the University of Göttingen. Bryn Mawr College in Pennsylvania welcomed Noether and she spent the last two years of her life teaching there.

**Ann Kiessling** is a biologist who has concentrated on stem cell research. She has also explored the relationships between viruses and cancer. In 2000, she developed the nation's first human egg donor program for stem cell research. In 2020, Kiessling expanded lab research at the Bedford Research Foundation to include Covid-19 testing. After her daughter, who works in a local hospital, tested positive for Covid, Kiessling expanded the Foundation's SARS2 testing to the public. She was born on March 29, 1942, in Oregon.

**Ann Kiessling**  
Source: Wikipedia per Creative  
Commons Attribution 2.0 License

**Mark Rober**  
Source: Wikipedia per Creative  
Commons Attribution 4.0 License

Former NASA engineer and Apple Special Projects designer **Mark Rober** is also a well-known YouTuber and inventor. For seven years, he worked on the NASA Curiosity Rover at NASA's Jet Propulsion Lab. Rober worked with authorities to use a device he invented that captured 15 people involved in scamming elderly victims out of thousands of dollars. Rober's YouTube videos played a major role in shuttering call centers in India that were being used in the scams. Rober was born on March 11, 1980, in Orange County, California.

# Your Health

If you enjoy a good cup of coffee, now there's another good reason to drink the popular

beverage. A recent study reported in [Nature Microbiology](#) shows drinking coffee is tied to specific bacteria in the gut that may benefit digestion. Researchers in Italy and Harvard worked together on the study and discovered the microbe *Lawsonibacter* is, on average, eight times more abundant in coffee drinkers than those who don't drink coffee.

A new [study from Finland](#) shows a surprising connection between the quality of our sleep and what we eat. More than 5,000

adults were studied. It turns out that the best sleepers, averaging between

seven and nine hours of sleep a night, ate 460 grams of fruits and vegetables. Those who slept less than seven hours consumed lesser amounts of fruits and veggies. The same is true for those sleeping more than nine hours. [Rollingout.com](#),

which calls the study groundbreaking, writes "Short sleepers, who are often prone to insomnia or disrupted sleep cycles, consumed an average of 37

grams fewer fruits and vegetables than optimal sleepers. Long sleepers,

on the other hand, were found to be 73.4 grams below the recommended daily intake. Both short and long sleepers demonstrated lower consumption of green leafy vegetables and fruits, which have long been associated with various health benefits, including better sleep regulation."

On a similar note, [Mattress Clarity](#) points out "As it turns out, the state of our "gut microbiome" (the thousands of microorganisms living in our gastrointestinal tract) can influence our ability to obtain quality sleep." Mattress Clarity reviews dozens of various mattresses and offers price breaks from its websites.

By Kurt Jefferson

# Your Health

**D**entists often urge their patients to floss their teeth daily. It can reduce plaque buildup—the sticky bacteria film blamed for causing tooth decay as well as gum disease. There’s another benefit that most people don’t realize according to a new study. Flossing at least once a week is thought to lower the risk of having a stroke caused by two factors: “A blood clot blocking blood flow and irregular heartbeats,” reports [ScienceDaily](#). This was one of the first of its kind studies in the U.S., questioning more than 6,000 people and making the connection between dental flossing and strokes. The lower risk of strokes was not dependent on whether the individual brushed regularly or scheduled routine visits to the dentist. Researchers in the Atherosclerosis Risk in Communities (ARIC) study discovered that

flossing is tied to a:

- 22% reduced risk of ischemic stroke (a type of stroke caused by a blood clot that blocks blood flow to the brain.)
- 44% reduction in the risk of having a cardioembolic stroke (blood clots moving from the heart.)
- 12% lower risk of Afib (atrial fibrillation, irregular and often a rapid heart rhythm.)

**A**n “alarmingly” high level of microplastics in human brains? Researchers at the University of New Mexico at Albuquerque have discovered tiny pieces of plastic embedded in human brains at far higher concentrations than other organs. Very tiny plastic pieces are in human brains, livers, the placenta, testes, and other organs according to scientists, reports the [UNM Health Sciences Newsroom](#).

# Your Health

A one-minute video game has been created to accurately identify youngsters with autism compared to those with ADHD (attention deficit hyperactivity disorder).

Researchers at Kennedy Krieger Institute and Nottingham Trent University developed the game called CAMI or the Computerized Assessment of Motor Imitation. [ScienceDaily](#) reports 183 children in the study were asked to imitate a video avatar's movements which were similar to a dance. The video game had an 80% accuracy rate at identifying children with autism versus neurotypical youngsters. The game scored a 70% rate of identifying children with autism instead of ADHD. Researchers say autism and ADHD often co-exist and can be quite difficult to diagnose.

A Canadian study called O'Stress was successful in reducing anxiety and lowering stress rates for older participants.

## Stress

170 seniors with an average age of 76 took part in the study. Researchers say the six-week stress management effort caused those involved to rely on

problem-solving strategies and lowered stress even three weeks after completing the program. [ScienceDaily](#) reports the study was conducted by the University of Montreal. After finishing the program, participants recorded lowered cortisol levels over non-participants. Cortisol levels are an accurate indication of stress levels.

Good mornin' to you! Okay. Maybe you aren't a morning person. A large study released by BMJ Mental

Health reveals that people tend to have a more positive

outlook in the morning. [MedicalXPress](#) reports "People generally wake up feeling in the best frame of mind in the morning, but in the worst around midnight, the findings indicate, with day of the week and season of the year also playing their part." Researchers analyzed data from the University College London Covid-19 Social Study.

By Kurt Jefferson

# Your Health

Love eggs? It turns out that eggs may just help older adults live longer and even reduce their chances of dying from heart disease. [Knowridge](#) reports on the study by Monash University. “Researchers

found that older adults who ate eggs 1 to 6 times per week had a 29% lower risk of dying from cardiovascular disease (CVD) compared to those who rarely or never ate eggs.” The journal *Nutrients* published the study which involved research on 8,756 people who were 70 and over.

Four universities are teaming up to launch a [decade-long study](#) of health impacts from the Los Angeles wildfires. The University of California-Davis calls the effort an “unprecedented collective scientific effort to understand the short- and

long-term health impacts.” Researchers from the UCLA Fielding

School of Public Health, University of California-Davis, Harvard T.H. Chan School of Public Health, and University of Texas-Austin will join together to perform the study. UC-Davis adds, “The research aims to evaluate which pollutants are present, at what levels, and where, and to assess the respiratory, neurological, cardiovascular, reproductive, and immune system impacts of the wildfires.” The wildfires, which began early this year, killed 29 people, destroyed more than 16,000 structures and exposed millions of people to toxic smoke, according to UC-Davis.

# Your Health

A drug used to reduce high blood pressure and prevent migraines has been shown to reduce strokes in women taking it to block migraines. The drug, Propranolol, was especially effective for women who have migraines without an aura. The drug did not provide the

same protection for men. [ScienceDaily](#) reports researchers studied more than three million health records from two separate databases. The findings were to be delivered at the American Stroke Association's international conference in Los Angeles.

What factors impact how long you live? Finland's Tampere University completed [three studies](#) revealing why some people live longer than others.

The results? Factors reported by the National [U.S. Library of Medicine](#) include how many years an individual smoked, mobility, how well educated a person is, self-rated health, marital status, endocrine and metabolic diseases,

respiratory diseases, unwillingness to do things and lack of energy.

Would you be surprised to read that, after obesity and tobacco, alcohol consumption is the third leading preventable cause of death? That's the word from the [U.S. Surgeon General](#). A new report says alcohol is responsible for 20,000 U.S. cancer deaths each year and about 100,000 cases of cancer.

Guess how many Americans have some form of hearing loss. 60.7 million, according to the [National Council on Aging](#). If you consider folks 65 and older, more than three out of ten experience some type of hearing loss. Here's an eye-opener: hearing loss is on the rise in the U.S. and is expected to almost double by 2060.

# Your Health

Researchers at the University of Cambridge in Britain have [created pajamas](#) they say can detect sleep apnea without the hassle of staying overnight at a hospital sleep clinic or wearing an uncomfortable device for home testing. Sleep apnea is a disorder in which an individual stops breathing while sleeping. An estimated 80% of sleep apnea cases in the U.S. are not diagnosed. Those who are untreated

often feel exhausted during the day. The washable

pajamas use neck sensors to identify six sleep stages with 98.6% accuracy. Small sensors can detect the difference between “regular sleep and disrupted sleep” as [Tom’s Guide](#) reports. In addition, “these sensors can tell if you’re snoring, grinding your teeth and even if you’re breathing through your mouth during the night.”

If you hate broccoli and have prediabetes (the condition before full-blown type 2 diabetes), you might want to think again. A study at the University of Gothenburg made a surprising discovery: people who had prediabetes and ate broccoli sprouts displayed improved blood sugar levels. [ScienceDaily](#) reports a chemical compound in broccoli known as sulforaphane is con-

nected to lower blood sugar in those with prediabetes. Most studies deal with diabetes, but

this one is unique in that it examined the precursor to type 2 diabetes. Approximately 34.5 million Americans have the type 2 version of the disease.
